

What's happening at MARIE GREY & ASSOCIATES?

Volume 1, Issue 4

October 2007

A futurist and historian, the writer of three popular books, a distinguished lecturer of the American Institute of Aeronautics and Astronautics, recently voted the top Speaker at the 2007 SAPOA Conference please welcome

DR. JACK BACON!

Jack Bacon has often been called "A New [Carl Sagan](#)." He is an internationally-known motivational speaker, a distinguished lecturer (emeritus) of the American Institute of Aeronautics and Astronautics (AIAA), and one of the most requested speakers in the USA for topics concerning technology and the factors that shape human society.

A noted futurist and a technological historian, he has written three popular books on the pace of technology and society - he has published the acclaimed "My Grandfathers' Clock," "My Stepdaughter's Watch," and "The Parallel Bang."

His lectures have captivated tens of thousands of all ages in thirty countries on six continents, and he has appeared on numerous radio and television broadcasts and documentaries. In his daily work, he is on the management team overseeing the construction and operation of the most complicated technical project in history: the International Space Station.

He was the United States' lead systems integrator of the "Zarya"- the jointly-built spacecraft that forms the central bridge and adapter between all US and Russian technologies on the Space Station.

This landmark in technological history was built in Moscow by American and Russian engineers and launched from the Baikonur Cosmodrome in November 1998.

Jack is a fellow of the Explorer's Club, a member of the AIAA and of the National Speakers Association, and was a founding member of the board of directors of the Science National Honor Society (www.ScienceNHS.org).

Among his numerous awards, he is a recipient of NASA's Exceptional Achievement Medal, the Director's Special Commendation, and the coveted Silver Snoopy award-the only award to fly in space. He routinely advises numerous academic programs and institutions, and he is a champion of education throughout the world. Jack has twice been recognized with the NASA Outstanding Speaker Award.

The fascinating topics covered by Dr Bacon are:

[The Parallel Bang: An Explosion of Human Understanding in the 21st Century](#)

Futurist, NASA Engineer, rocket scientist, author and technological historian Dr Jack Bacon presents a compelling vision that human thought, which houses the parallel universe of information and all the models of the physical universe in which we live, is undergoing an explosive new phase of development not unlike the surge that occurred in the Renaissance or the Bronze Age. Fasten your seatbelts and prepare for the explosive growth in the creation of our new intellectual universe: The Parallel Bang!

[Power, Communication and Africa in the Next Generation](#)

A detailed look at how the knowledge-based economy, new power generation technologies, and social shifts in the new Global economy may affect Africa as an emerging strong player in global affairs.
